

## World of Concrete 2013

### WOC, Here We Come!

February is fast approaching and we are getting ready for Hanley-Woods "World of Concrete" expo in Las Vegas. Attendance is expected to exceed 52K folks, each with a burning desire to learn how to stay out in front of the competition utilizing the newest technologies available in the concrete industry.

Phoenix Curb Machines will be there again this year along side of our distribution partners from Equipment Synergy International (ESI). Come see us at booth #030426 on the "Silver" lot outside where we will be featuring three of our most innovative products:

- \* **The Phoenix PCM 7500 - The first and only "true" mid-sized curbing machine on the market**
- \* **The Phoenix PCM 2500 - Our smallest, yet extremely versatile curb machine**
- \* **The Phoenix Lift-Off LF-3000 - The newest innovation in heavy equipment "Lift-off" technology**

Visit us or give us a call. Or, give us a call. We would be happy to meet with you privately to demonstrate all of the truly unique features found only in the Phoenix line of products!

Have a look at some of the testimonials we have accumulated just from a recent retro-fit project at the West Virginia University campus. 1,200 lineal feet of 20 inch "straight-up" curb placed 14" down in the hole, while negotiating multiple cross-slopes and impediments. You can read a downloadable copy of a case study done on the "Retro-Fit" pour at the West Virginia University [here](#).

Actual video footage of the pour can also be seen [here](#)

*"As perfect a curb as you'll ever find, performed on time, under budget and with lower labor costs"*

Donnie Hawkins

Project Supervisor

Green River Group Const.

Project: 1,200 Feet West

Virginia University Retro-Curb

installation

*"We are trying to develop a full-time curbing crew and the Phoenix 7500 will help us do that with less expense and less capital outlay than larger curbing machines costing at least 33% more"*

Steve Calvert

Owner

Green River Group Const.

Morgantown, WV

*"This machine just nails it. It's compact yet we can do most of what the other larger machines can do and meet contractor's needs"*

Paul Guzik

Owner

Guzik Concrete

Lake Lynn, PA

## PCM-7500

The true bad-boy of our line ...Under 10,000 pounds, yet capable of curbing and paving at dimensions equal to machines 3 times it's size! Includes 24" x 72" Retractable Grading Auger and the TopCon System 5 Grade Controller

## Two Machines In One

No need to wait for excavators to "fine tune" grade...The 7500 can handle that job easily with it's built-in 72" trimmer auger and a Top Con System 5 Grade Controller.
